In this project we develop a Home page for a **Pharmacy** that displays medical advertisements, various products as well as a link to Lab Test Form page.
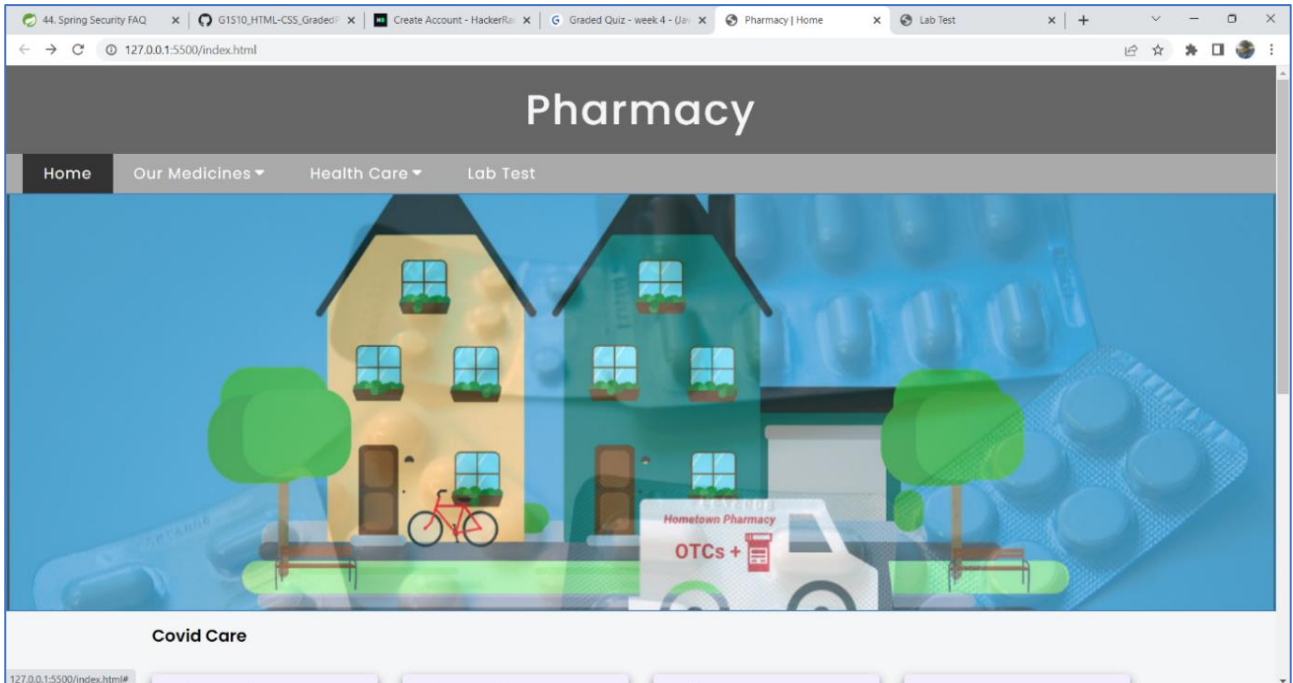

Home Page
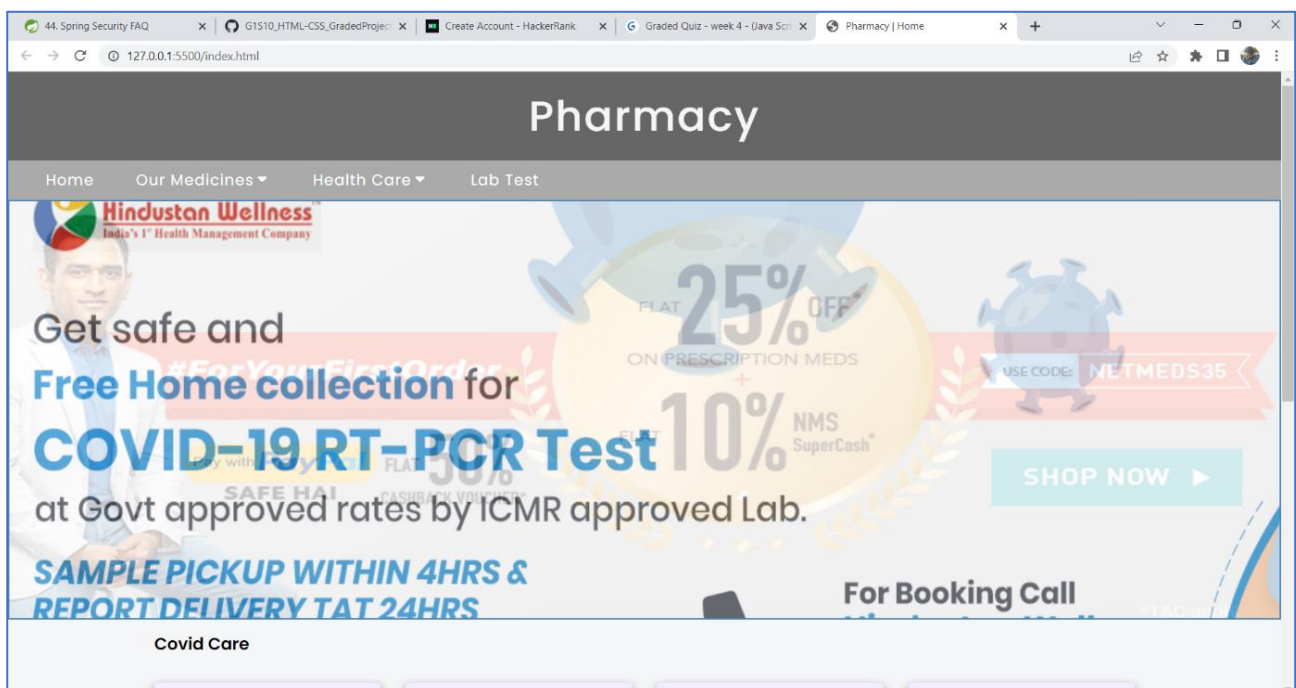

Home Page

As we see, the Home page starts with a header displaying "Pharmacy" at the center. Followed by a Navigation bar containing links to,
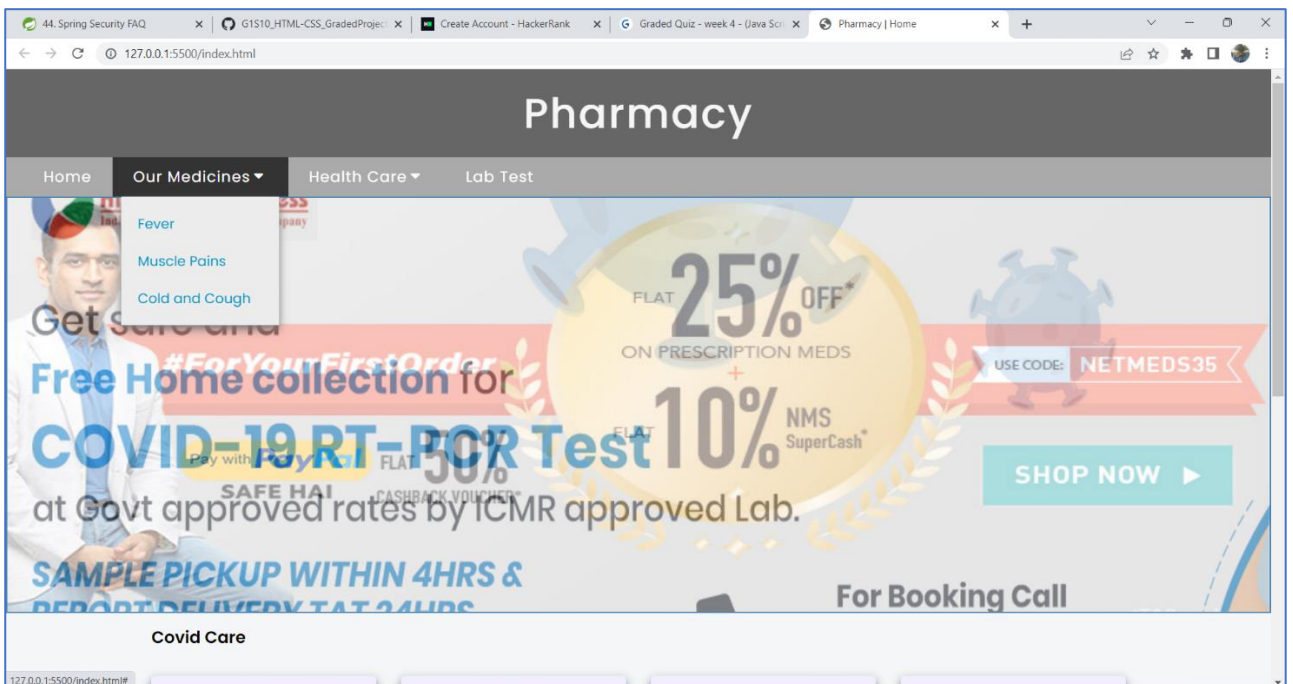

- Home Page
- Our Medicines
    Sublinks -> Fever, Muscle Pains, Cold and Cough
- Health Care
    Sublinks -> Baby Care, Skin Care, Home Care, Personal Care, Pet Care
- Lab Test

When hovered over any link, the background gets a dark color. And a menu drops down for some links.
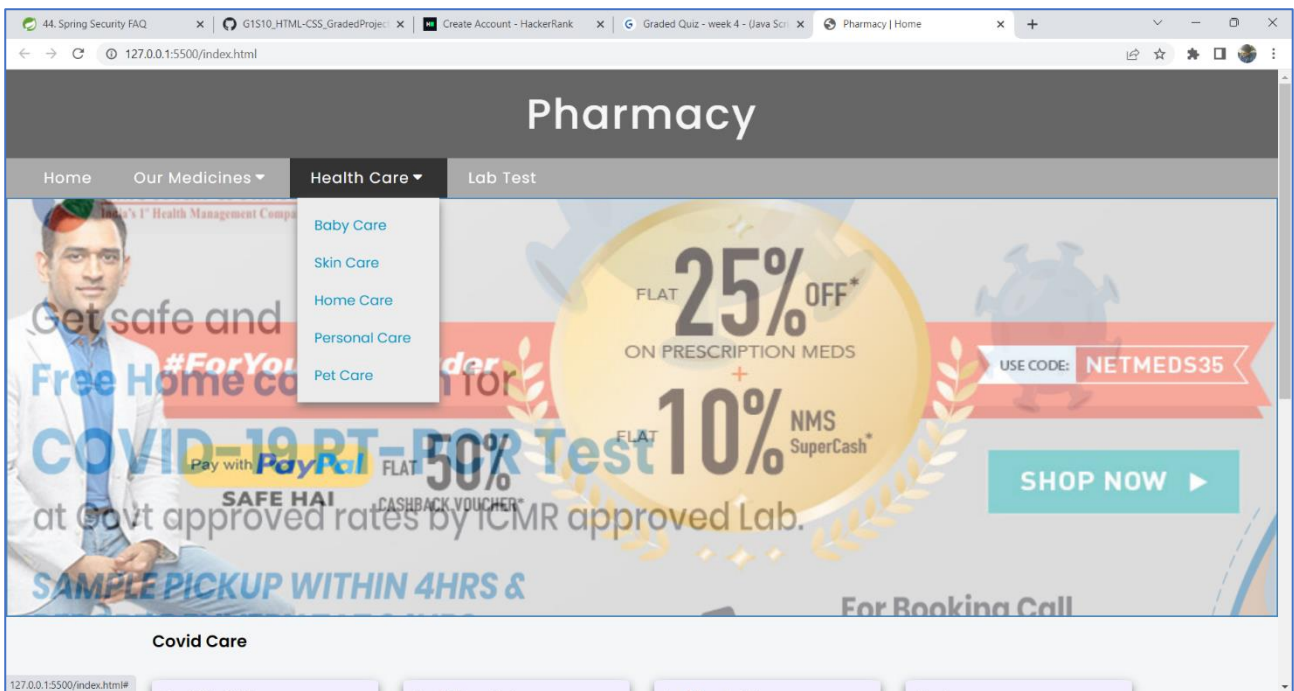

The Links within dropdown menus change colour when cursor hovers upon them.

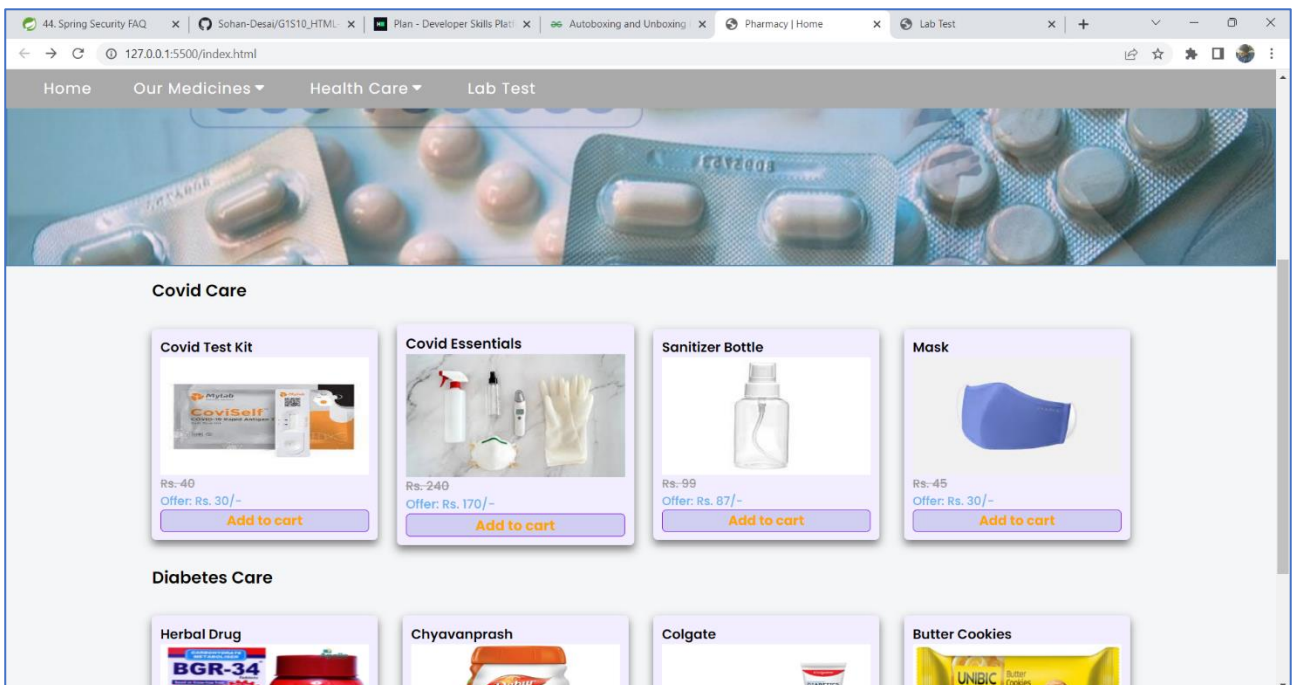

Hover effect on Home Link

Hover effect on Medicines Link. Dropdown appears

Hover effect on Health Care link. Dropdown appears

On scrolling the page, the Header scrolls out of window while the Navigation bar sticks to the top of page.

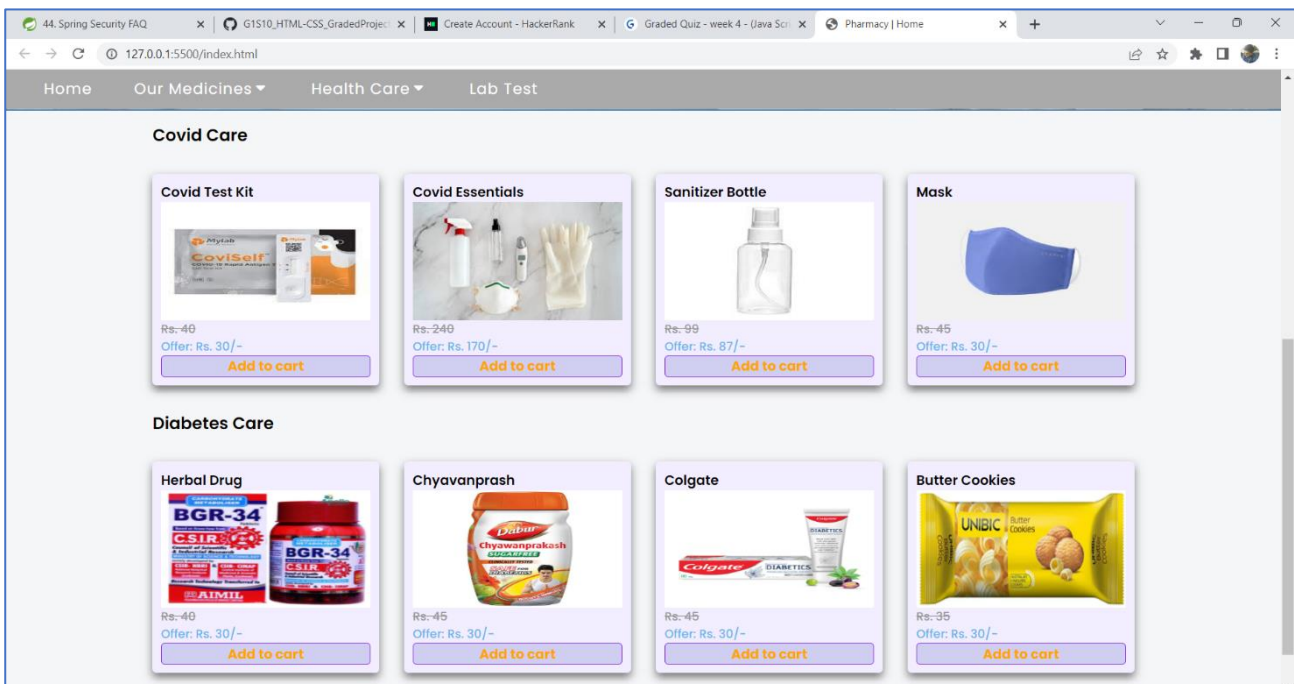

Navbar sticking to the top

In the next section we see an animation displaying various medical advertisements in an infinite cycle. This section has a border of 2px solid steelblue.

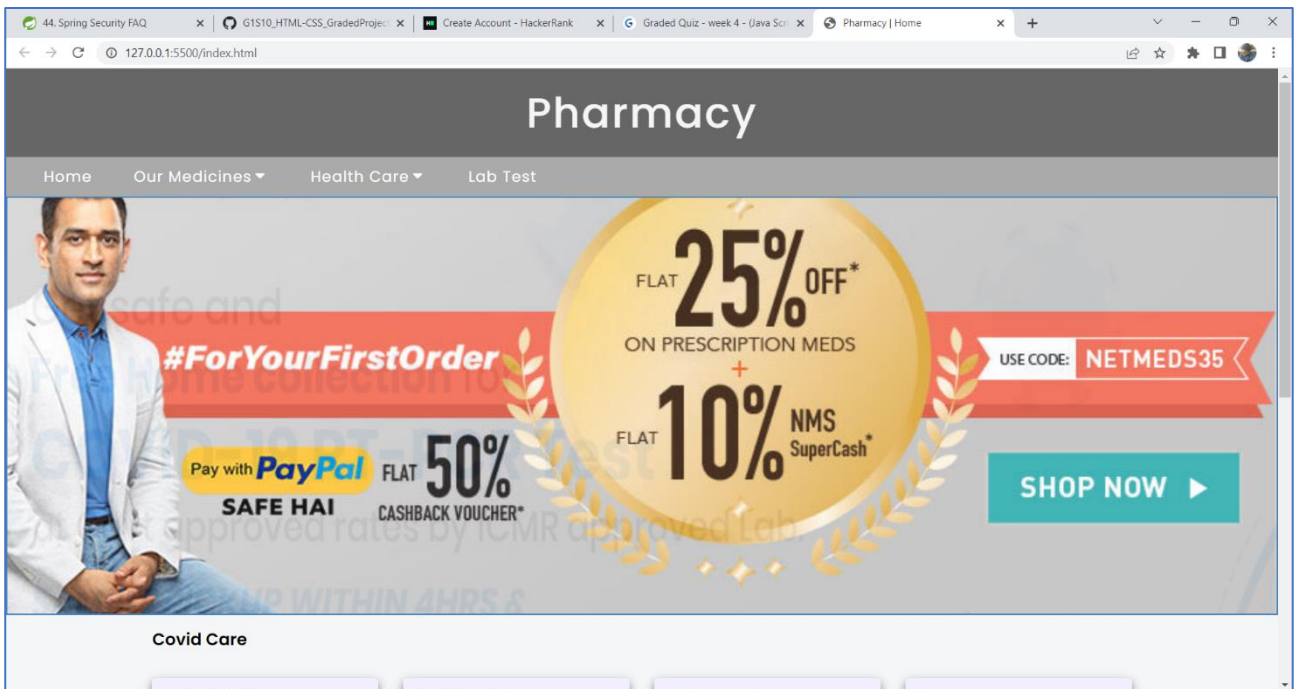

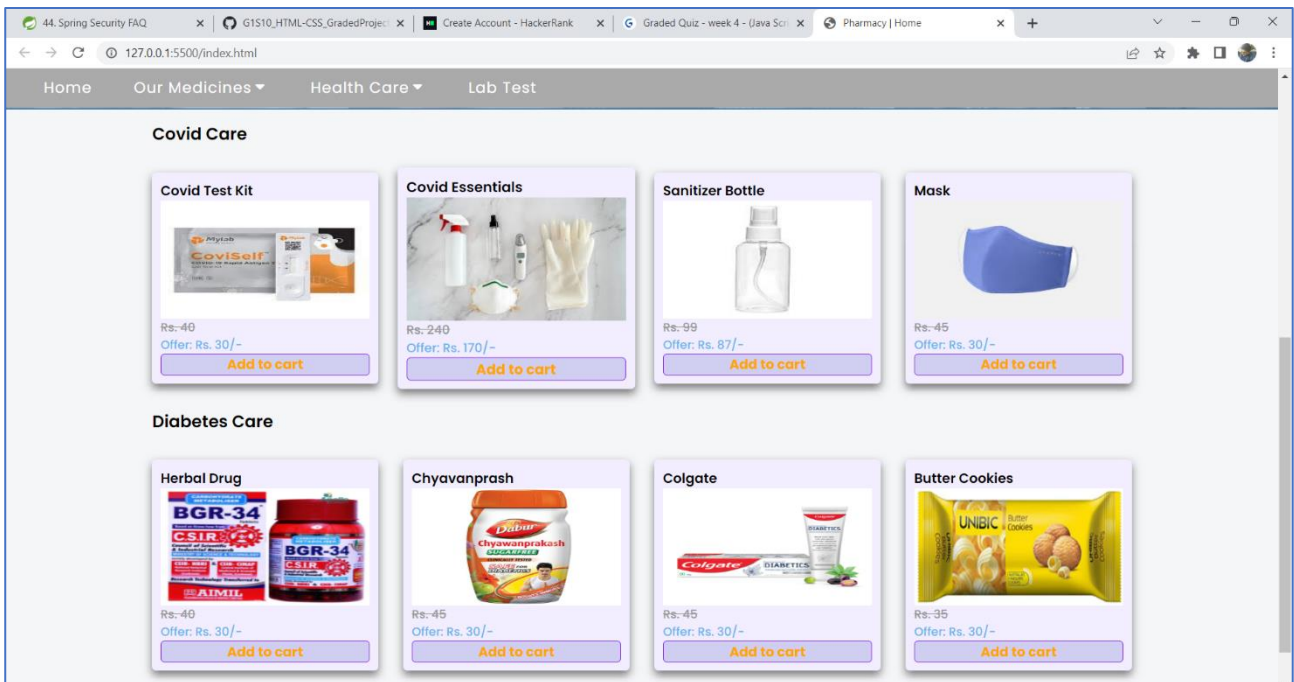

Animated Slideshow

Following that comes the Product section. This section has two sample rows as **Covid Care** and **Diabetes Care**

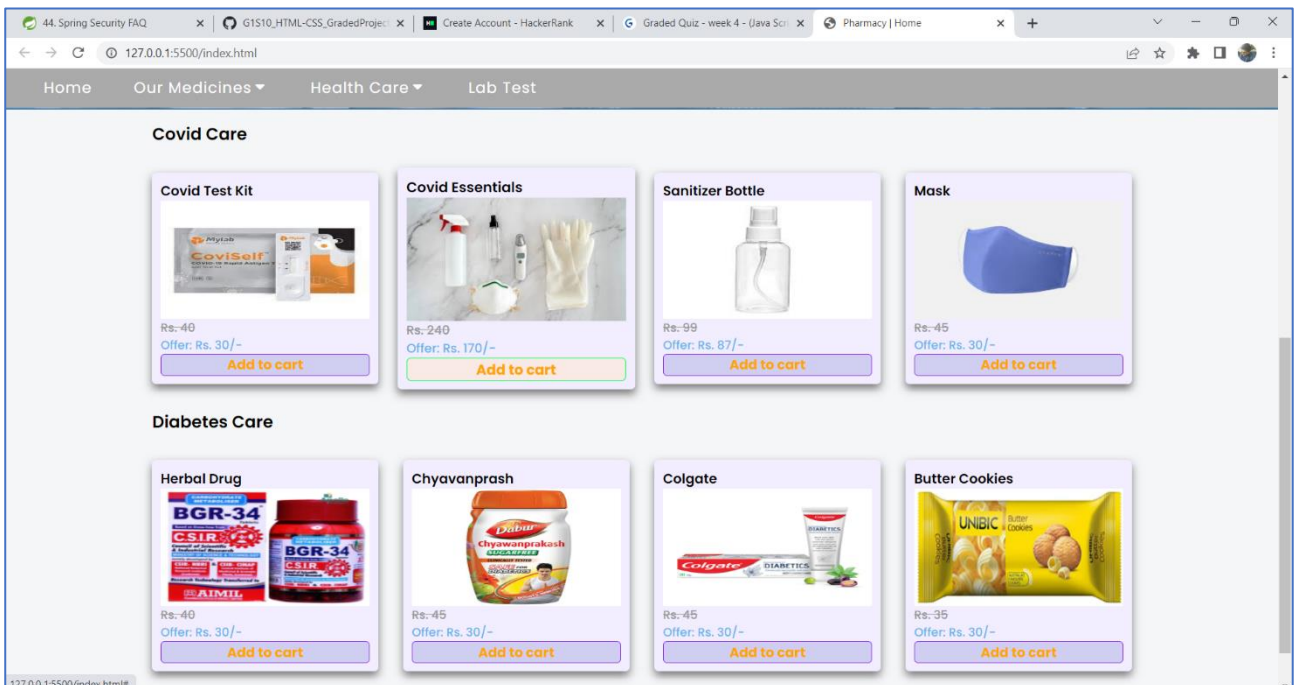

Products section

Each of them display products with product name, image, price and price after Offer and a "Add to Cart" button

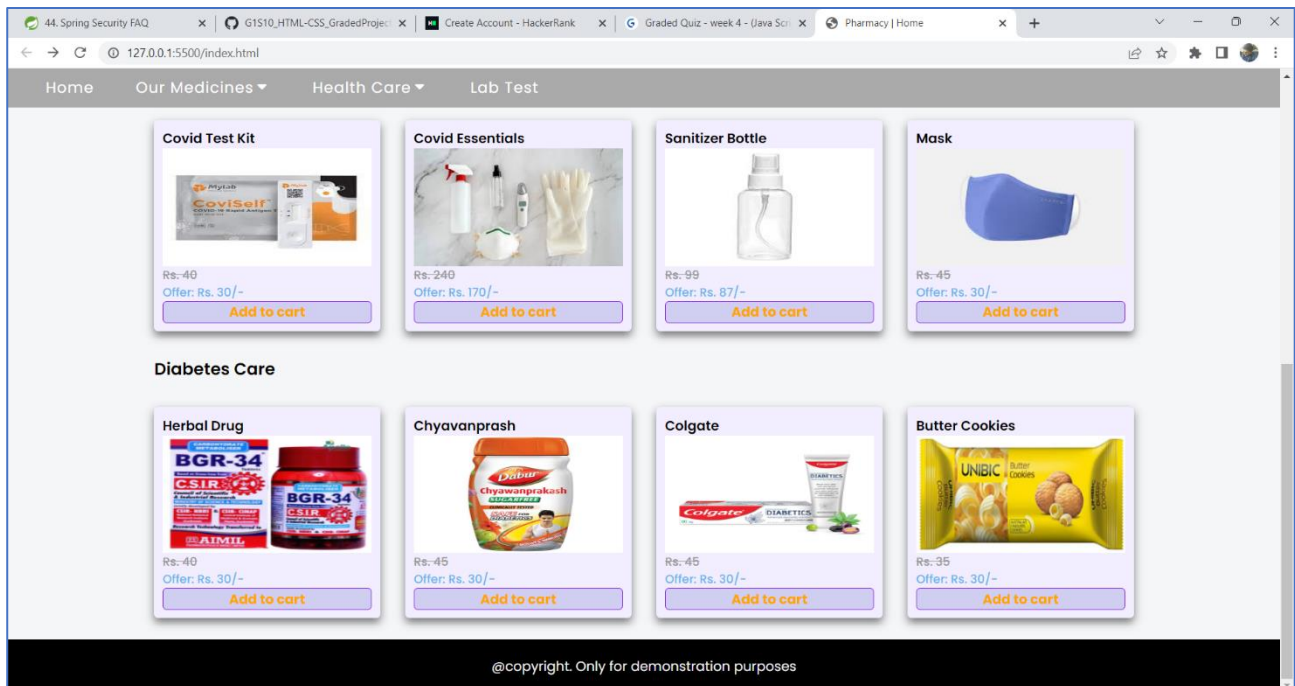

The product tabs have an hover effect that causes them to scale 105% when cursor hovers over them.

When clicked on the "Add to cart" button, its background color changes to rgb(250, 234, 230) and the border color changes to rgb(0, 255, 76).

At the very end is the Footer saying, *"@copyright. Only for demonstration purposes"* with a black background and white font

Footer

Lab Test Form Page

On clicking the "Lab Test" link a new page opens with above form

Lab Test Form

Both the form and image are side by side and positioned to the center of the page.

The image remains fixed in the form-window while the form scrolls.

The form has validation along with animated labels

Reset and Submit buttons are placed outside the form. The buttons have hover effects that change their background colour.

Responsive Design
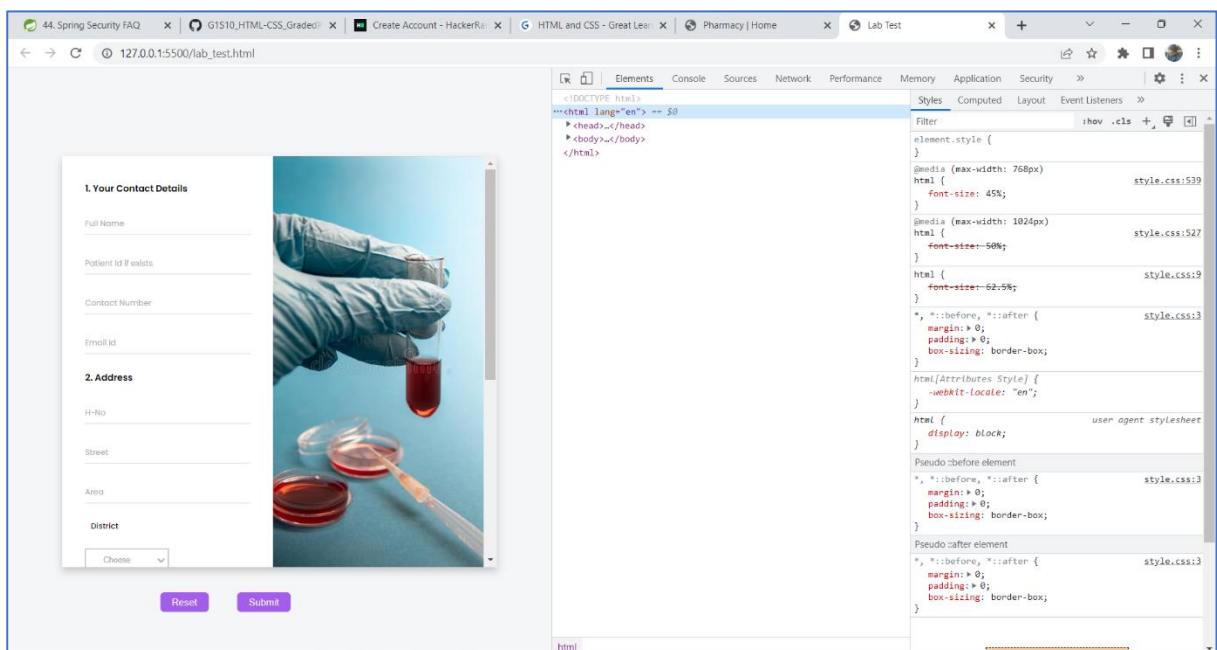

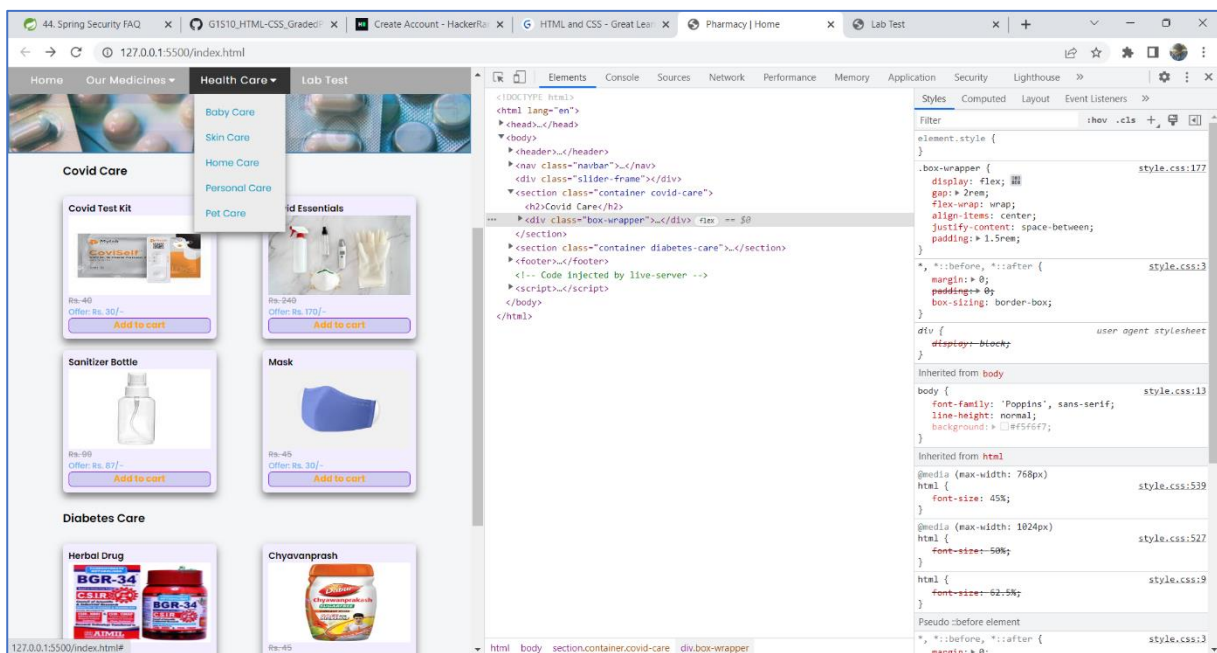

The entire webpage has responsive design that adapts to every browser size.

Also you will find a video recording of this project on our google drive. Link to which is shared below.
